	None Other Both	
Planned Attachments:	Sideshifter Install kit Attachment Part #:	
	SS Fork Positioner Has mast been evaluated with specified attachment? Attachment OEM:	
	Single/Double	
	Carton Clamp	
	Other	

APPLICATION

Are you using push back racking? Contact LTI when push back racking systems are used to determine maximum allowable mast pushing force specification.

Does the application involve offset loads or wide loads?

Description of Application (including critical specifications, load types and operating environments, expected attachments):

Do you need critical mast specifications for OEM data plate raiting (Form 29)?
